

Assignment 13.2

Problem Statement :-

A Fibonacci series (starting from 1) written in order without any spaces in between, thus producing a sequence of digits.

Write a Scala application to find the nth digit in the sequence.

Write the function using standard for loop

Write the function using recursion

Solution:-

The Scala Application for the above Problem Statement is as follows:-

```
object Fibonacci2 {  
  
  def main(args: Array[String]): Unit = {  
  
    println("Enter a number:")  
  
    var num: Int = scala.io.StdIn.readLine().toInt  
  
    var num1 = 0  
  
    var num2 = 1  
  
    var a: Int = 0;  
  
    var b: Int = 0;  
  
    println("Using Standard for loop")  
  
    for(a <- 1 to num){  
  
      val sumOfPrevTwo = num1 + num2  
  
      num1 = num2  
  
      num2 = sumOfPrevTwo
```

```
}  
  
println(num + "digit in the sequence is:"+num2)  
  
println("Using Recursion")  
  
println(num + "digit in the sequence is:"+fib1(num))  
  
}  
  
def fib1(n: Int): Int =  
  if (n < 2)  
    1  
  else  
    fib1(n-1) + fib1(n-2)  
}
```

1 object Fibonacci2 {  
2   def main(args: Array[String]): Unit = {  
3     println("Enter a number:")  
4     var num: Int = scala.io.StdIn.readLine().toInt  
5     var num1 = 0  
6     var num2 = 1  
7     var a: Int = 0;  
8     var b: Int = 0;  
9     println("Using Standard for loop")  
10    for(a <- 1 to num){  
11      val sumOfPrevTwo = num1 + num2  
12      num1 = num2  
13      num2 = sumOfPrevTwo  
14    }  
15    println(num + "digit in the sequence is:" + num2)  
16    println("Using Recursion")  
17    println(num + "digit in the sequence is:" + fib1(num))  
18  }  
19  
20  def fib1(n: Int): Int =  
21    if (n < 2)  
22      1  
23    else  
24      fib1(n-1) + fib1(n-2)  
25  }  
26}
```

Run Fibonacci2

"C:\Program Files\Java\jdk1.8.0_144\bin\java" ...

Enter a number:
10
Using Standard for loop
10digit in the sequence is: 89
Using Recursion
10digit in the sequence is: 89
Process finished with exit code 0
